8/4/2014	SB1400393	501 H ST NE	We propose drilling four, six-inch diameter geotechnical test borings using the hollow stem auger method to evaluate the subsurface conditions. The proposed test boring depths will be 40 feet below the existing ground surface. Drilling equipment will be decontaminated between each hole to avoid cross contamination throughout the site. Upon completion, the geotechnical test borings will be backfilled with grout to the existing ground surface within 24-hours. The borehole will be tremie-grouted in one continuous operation with a positive displacement pump using a bentonite slurry mix from the bottom of the borehole upward. Drilling spoils including soils and water from the test borings will be containerized in 55-gallon drums to be removed for disposal after chemical laboratory results of the spoils have been received and reviewed. Spoils will be disposed of in accordance with Federal and District laws and regulations.	Building	Construction	Miscellaneous	Soil Boring	Permit Issued	36.30	0833 0047	6	6C		GEOCAPITOL ENGINEERING, LLC	Jemal's CDC LLC	
8/5/2014	SB1400397	406 H ST NE	Proposed construction will consist of building a four-story 5000 square foot structure. The structure will have a sublevel throughout its entire floor plan. As a result, a geotechnical study consisting of two test borings has been requested for the project. The test borings will be done in readily accessible areas withing existing gravel covered parking area behind the existing structure as other areas were not accessible. 8/26/2014	SB1400375	1200 SOUTH CAPITOL ST SE	Environmental soil borings for due diligence investigation. Advance a series of 10 environmental soil borings at the subject site to collect soil and groundwater samples for field screening and laboratory analysis. The soil borings are being conducted as part of a due diligence investigation associated with a real estate transaction. Investigation Derived Waste -IDW- will be laboratory tested and removed from the property for disposal. Permanent casing will not be used as the proposed borings will be abandoned and grouted upon the collection of grab soil and groundwater samples. Borings will only be advanced into the upper level of the surficial aquifer to facilitate the collection of groundwater samples and will not extend through the surficial water bearing zone. Ten Direct-Push -Geoprobe- soil borings -GP-1 through GP-10- for grab soil and groundwater samples. Borings to be grouted upon completion. No well installations. The soil boring diameter will be two inches by max depth of 25 feet, as per site plans, work plan report, DDOE-DC Well Construction/Schematic Forms. Work will be conducted under DDOE regulation. 8/12/2014	SB1400410	1620 2ND ST SW	URS will conduct subsurface soil sampling using direct push methodology to investigate if subsurface petroleum contamination is present that would be encountered by substation construction. The investigation will include conducting up to six direct push borings to a depth of up to 20 feet below ground surface. Up to two soil samples will be collected from each boring location for a total of 12 samples. Each sample will be analyzed for volatile organic compounds VOC, SVOC, and petroleum hydrocarbons gasoline and diesel range organics. If groundwater is encountered during advancement of the borings a groundwater sample will be collected and submitted instead of a second soil sample from the boring location. Selection of soil samples for laboratory testing will be based on field observations, staining, odor, organic vapor instrument readings. Please see the attached. Hydration Method sheet for additional backfilling information. 8/29/2014	TN1400185	2400 EAST CAPITOL ST NE	Our organization is planning to host a 5k on the grounds at RFK Stadium. We will erect two 30x60 tents on the grounds. The tents will be used as a production office for our staff. We will keep equipment such as staff radios under the tents. We will also have 12 8' foldable tables under one tent for staff meals. No cooking will take place under the tents. The other 30x60 tent will be used to house equipment not in use. No tent walls will be erected. We will have smaller tents to have our registration team and merchandise team under. These tents will be 10x10. The registration tents are erected with a table under each. Staff and volunteers will sit at the tables and check participants in. The merchandise tables are erected and our merchandise will be kept under the tent, where staff will help event participants with any purchases.
